

PERSONAL TELEPRESENCE™

Personal Telepresence is a life-size, single-screen telepresence solution for private offices and individuals at a low cost, accommodating a wide spectrum of meeting experiences with ultimate reliability.

Teliris Telepresence develops and implements the world's most innovative fully managed telepresence and collaboration solutions, realistically replicating the human dynamics of an in-person meeting experience. Through its 6G platform, Teliris has radically simplified the acquisition, deployment and operating costs of telepresence, breaking new ground in adoption and reach of the technology.
