TELIRIS DEBUTS THE FIRST WEB-BASED TELEPRESENCE CAPABILITY

Teliris' WebConnect Allows Remote Users to Participate in Life-Like Virtual Meetings Via Internet Connection

Enhanced Touch Screen Offering Enables Customers to View, Schedule or Change Meetings in Real-Time

San Diego, CA - June 4, 2007 — Teliris, the leading full-service provider of telepresence solutions, today announced the release of its WebConnect technology - the first of its kind that allows for remote participants to engage in a virtual meeting through any broadband Internet connected Web-based device.

The new technology allows for outside users to view, hear and interact in a full telepresence meeting with their colleagues by connecting to any broadband Web-enabled device WebConnect also offers the ability to review presentation materials or any other content displayed in the meeting room.

"By extending the reach of Teliris' VirtualLive™ solution to the Web, we have opened up new avenues for virtual collaboration by connecting a broader spectrum of telepresence users without compromising the effectiveness of the meeting," said Marc Trachtenberg, Teliris CEO and co-founder. "Today, many businesses operate with employees that work in dispersed locations. This is one more way that Teliris is helping its customers to communicate through its VirtualLive™ solutions more effectively and more often."

Teliris also announced today that as a part of its end-to-end managed service offering, the company will launch an enhanced, interactive version of its touch screen wall panel that allows customers to view, schedule or change meetings in real-time outside the VirtualLive™ conference room.

About Teliris Ltd

Founded in 2001, Teliris develops, implements and manages the world's most widely deployed telepresence systems, realistically replicating the human dynamics of a live meeting. Teliris has deployments in 19 countries with the largest installed base of Fortune 500 companies, including Pearson plc, GlaxoSmithKline and Royal Bank of Scotland, among others. Headquartered in New York and London, the company combines a fully managed service with end-to-end integration that offers businesses a 24/7 multipoint capability with a 99%+ availability guarantee, ensuring they can respond and collaborate as needed. In 2007, Fidelity Ventures and Columbia Capital took a major equity stake in Teliris.
